## M21 MORTAR HALF TRACK CONVERSION KIT

THE US ARMY ORIGINALLY USED THE SHORTER BODIED M2 HALF TRACK FOR THEIR FIRST SP MORTAR AND THEN LATER THEY DESIGNED THE M21 ON THE M3 CHASSIS. IT MOUNTED AN 81MM MORTAR FIRING FORWARD AS THE M4 MORTAR FIRED REARWARDS

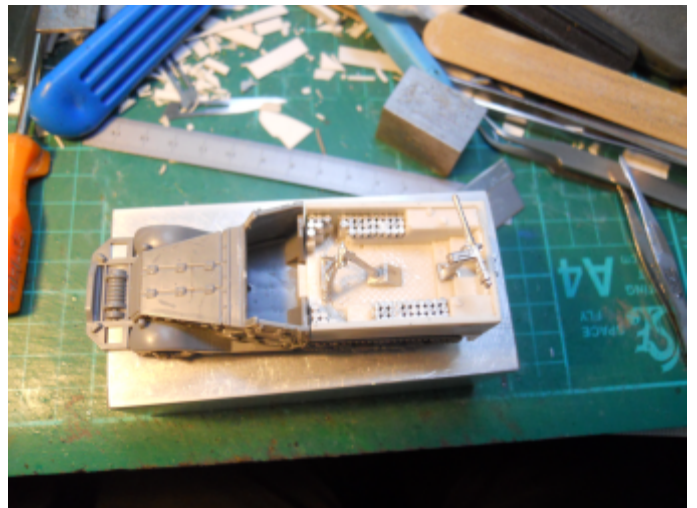

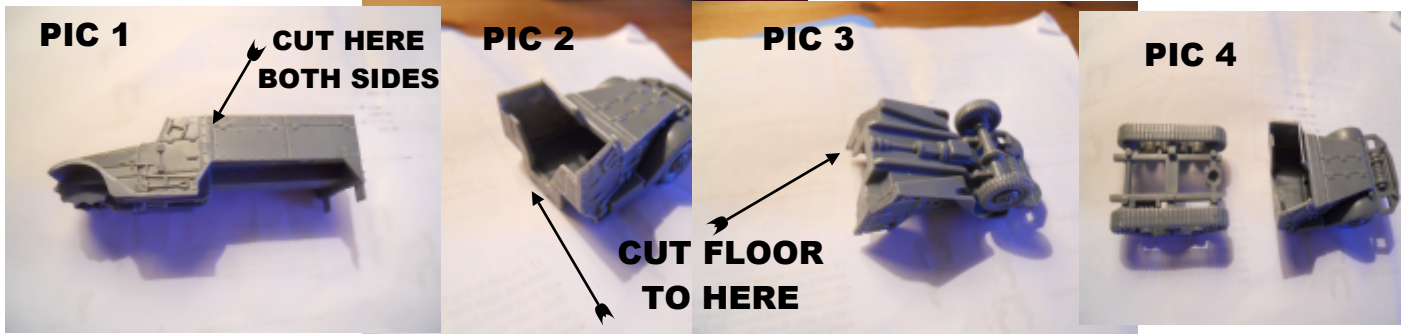

THIS CONVERSION KIT IS DESIGNED FOR THE PLASTIC SOLDIER CO M3 HALF TRACKS, IT MAY FIT OTHER MAKES.

ASSEMBLY NOTES:-

AS THIS KIT REQUIRES SOME CUTTING OF THE BASIC PSC BODY AS SHOWN IN PIC 1 THERE IS A GROOVE ON THE BODY TO FOLLOW.

CUT THE FLOOR FLUSH WITH THE REAR OF THE CAB AS IN PIC 2 & 3.

THEN FIT THE FRONT AXLE AND WHEELS THEN YOU ONLY NEED THE REAR TRACKS AND CHASSIS, (AS IN PIC 4) TO FIT TO THE BOTTOM OF THE NEW RESIN BODY, THEN FIX THE BODY TO THE REAR OF THE CAB.
