BRITISH SHERMAN MK 1 ARV CONVERSION KIT

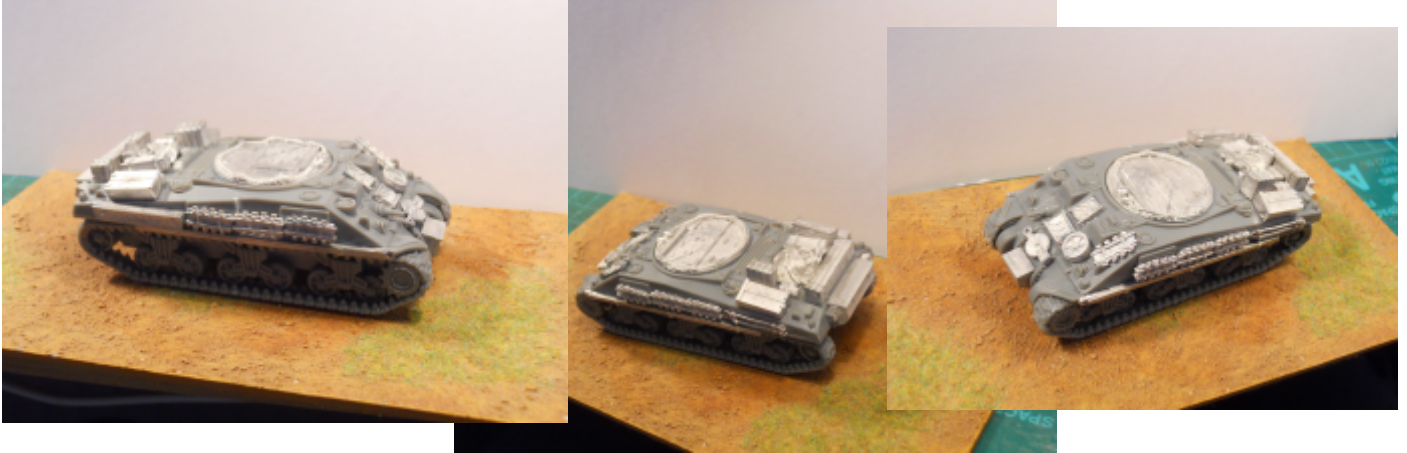

THIS WAS A SIMPLE CONVERSION OF THE US SHERMAN TANK INTO A RECOVERY TANK BY THE BRITISH BEFORE THE NORMANDY LANDINGS.

THE TURRET WAS REMOVED THE SPACE WAS PLATED OVER AND A SMALL TWIN HATCH WAS FITTED IN IT'S PLACE.

VARIOUS RECOVERY ITEMS WERE ADDED TO THE HULL LIKE TOW ROPES, AN 'A' FRAME, TOWING ARMS, WOODEN BLOCKS AND OTHER EQUIPMENT. USED IN VEHICLE RECOVERY.

IT HAD NO WINCH HOW EVER, UNLIKE THE LATER MK 2 VERSION.

NORMAL CONVERSION WAS ON THE M4A4 (SHERMAN V) HULL.

THE ADD ON KIT SHOULD FIT ANY SUITABLE SHERMAN AND IS SHOWN HERE FITTED TO THE PSC M4A4 HULL, BUT THE ARMOURFAST SHERMAN M4 AND M4A2 SHOULD BE SUITABLE.

THE VARIOUS STOWAGE IS A GENERAL SET AND EACH RECOVERY CREW WOULD ADD MORE ITEMS AND STOWAGE COULD BE RE-ARRANGED ACCORDINGLY.
