

# 1/72 scale Sherman M32 TRV (arv) conversion kit

There were 4 sherman variants that were used for the basis for the US armies TRV.

The M4, M4A1, M4A2 & M4A3, both early and late hulls were used as well as the early and late suspension systems. This kit should fit any 1/72 scale Sherman model.

There are 3 types of 'A' frame mounting marked either 'E' 'C' or 'L' for Early, cast or late 47 deg hull types, (specified when ordering), they only differ slightly to fit the shape of the hulls.

Picture 1

2 types of spare drive sprockets and road wheels are made for this model, you will have either picture 1 or 2 type. Both types were used in WW2

Picture 2

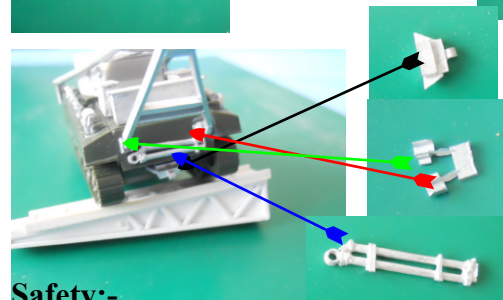

Front & rear tow bar mounts, towing bar, drive sprocket cover, block & tackle, Gas bottle, & main winch cable fairlead.

Main 'A' frame, Small 'A' frame, 'A' frame extension, 'A' frame wire rope supports, main 'A' frame supports, (3 types) & rear hull support brackets

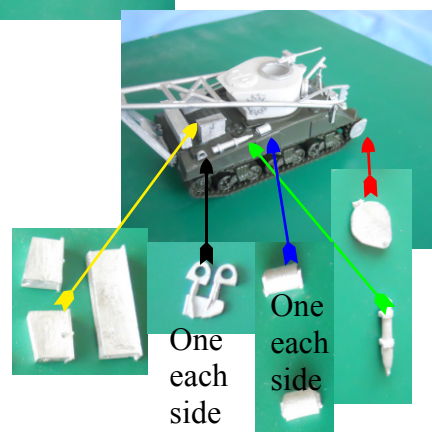

3x stowage lockers, .50 hmg & mount, 81mm mortar, (not always fitted in the field) 2 x spare return rollers

## Safety:-

Do not allow anyone to eat or chew any parts of this model, it contains lead. Always wash hands after handling parts

One each side

The spare wheels and drive sprockets could be fitted on the turret or hull.

**Mortar not always fitted**

## Please note:-

Stowage varied enormously as crews found the best place to store equipment and acquired more recovery gear.

**We also sell packs of stowage.**
